PROFILE

Aspiring to Work with Professional Organization in Area of **Information Technology** and as a **Software Engineer** Using My Own Domain Knowledge and Strive to Contribute My Best Through Sincere, Hard and Aimed Efforts and Deliver **Best Product Quality** and Focus on **Solving Problems**, Thus Helping in Growth of Organization.

EDUCATION

Dr. A.P.J Abdul Kalam Technical University

Lucknow, India

Bachelor of Technology in Computer Science & Engineering

2021– 2025

- Among the top 10% of the batch.
- Relevant coursework in Data Structure, Ai, C, Java, DBMS, Networking. • CGPA:7.5

SKILLS

Technical: SQL, Python, Java, C, Oracle Db, SQL Server, Html, CSS, JS, Linux, Problem Solving, Team Collaboration, Git. **Tools:** IntelliJ Idea, Visual Studio Code, Oracle Virtual Box, Oracle SQL Developer, Jupiter.

CERTIFICATIONS

- OCI 2025 Certified AI Foundations Associate – Aug'25([link](#))
- Deloitte Technology – Aug'25([link](#))
- Python – Sep'22 ([link](#))
- SQL (Basic & Intermediate) – May'25 ([link](#))

INTERNSHIP & TRAINING

Lernomate Technology

Pune, India

Oracle Db Intern

Mar'25 – Aug'25

- Implemented **RMAN** backup/recovery strategies, reducing simulated recovery time by **30%**.
- Created **Schema** diagrams and optimized SQL queries.
- Resolved **user access** and **privileges** on DB objects.

Code Alpha

Lucknow, India

Python Development Intern

Nov'24 – Dec'25

- Debugged and **optimized** code in Python.
- Automated reporting with custom **Python scripts**, Improving efficiency by **15%**.
- Created a **Stock-portfolio tracker** and a **Mental health chatbot** using Python with modular design.

PROJECTS

Civic-Ledger ([link](#))

Jun'25 – Aug'25

- Built a **blockchain-powered** backend for Civic Ledger to enable transparent, auditable public sector transactions using **Move smart contracts** and modular architecture.
- Used **React**, **JavaScript**, **Move smart contracts**, and **GitHub workflows** to build a modular, blockchain-powered backend enabling transparent and auditable public sector transactions.
- Enabled **real-time** auditability and **public trust** by delivering a blockchain-based backend that streamlined civic data access and reduced **manual verification efforts**.

- Designed a **Relational Library Management System** in MySQL to automate book issuance, overdue tracking, and branch-level reporting using stored procedures and **Analytical SQL queries**.
- Used MySQL, **Stored Procedures**, CTAS queries, and relational schema design to build a **scalable**, analytics-ready Library Management System.
- Improved operational **efficiency** and **data accuracy** by automating library workflows, enabling overdue tracking and branch-level performance reporting through advanced SQL procedures and analytics.

ACHIEVEMENTS

- **Grew a professional LinkedIn network to 1,000+ connections**, boosting project visibility and attracting collaborators for Civic Ledger and Aptos demos.
- **Earned OCI Foundations Associate certification**, validating cloud proficiency across compute, storage, networking, and identity—accelerating backend deployment readiness.
- **Ranked in the top 5% at Aptos-Pune-Hackathon** among 300+ developers by delivering a judge-ready blockchain demo with modular Move contracts and branded repo.
